

New Jersey's "Do Not Call" law is Right On! Why, because it literally gives me peace of mind, and not too many things help me relax like that. I do not want any uninvited business, political party, or PAC disturbing my dinner or any other evening activity. Even if my own political party calls at night, I tell them to go away and not bother me with phone calls, just mail me the information, so I can read it at my leisure. No solicitor is welcome to call me at home. They can just mail me stuff. DO NOT undo New Jersey's great law; instead it should be in every stste.
